Paper Craft

01 Aft hull

Score blue dashed lines before cutting. Cut bold outer outlines only; keep all pale glue tabs.
Fold walls up with the printed base facing down. Glue matching 1A, 1B, etc. behind their marked edges.
Fold the DECK rim tabs inward. Glue the two straight JOIN end walls back-to-back; keep both bottoms level.
This is a simplified waterline model: the underwater hull, tiny fittings and weapons are omitted.

Cut: bold outline

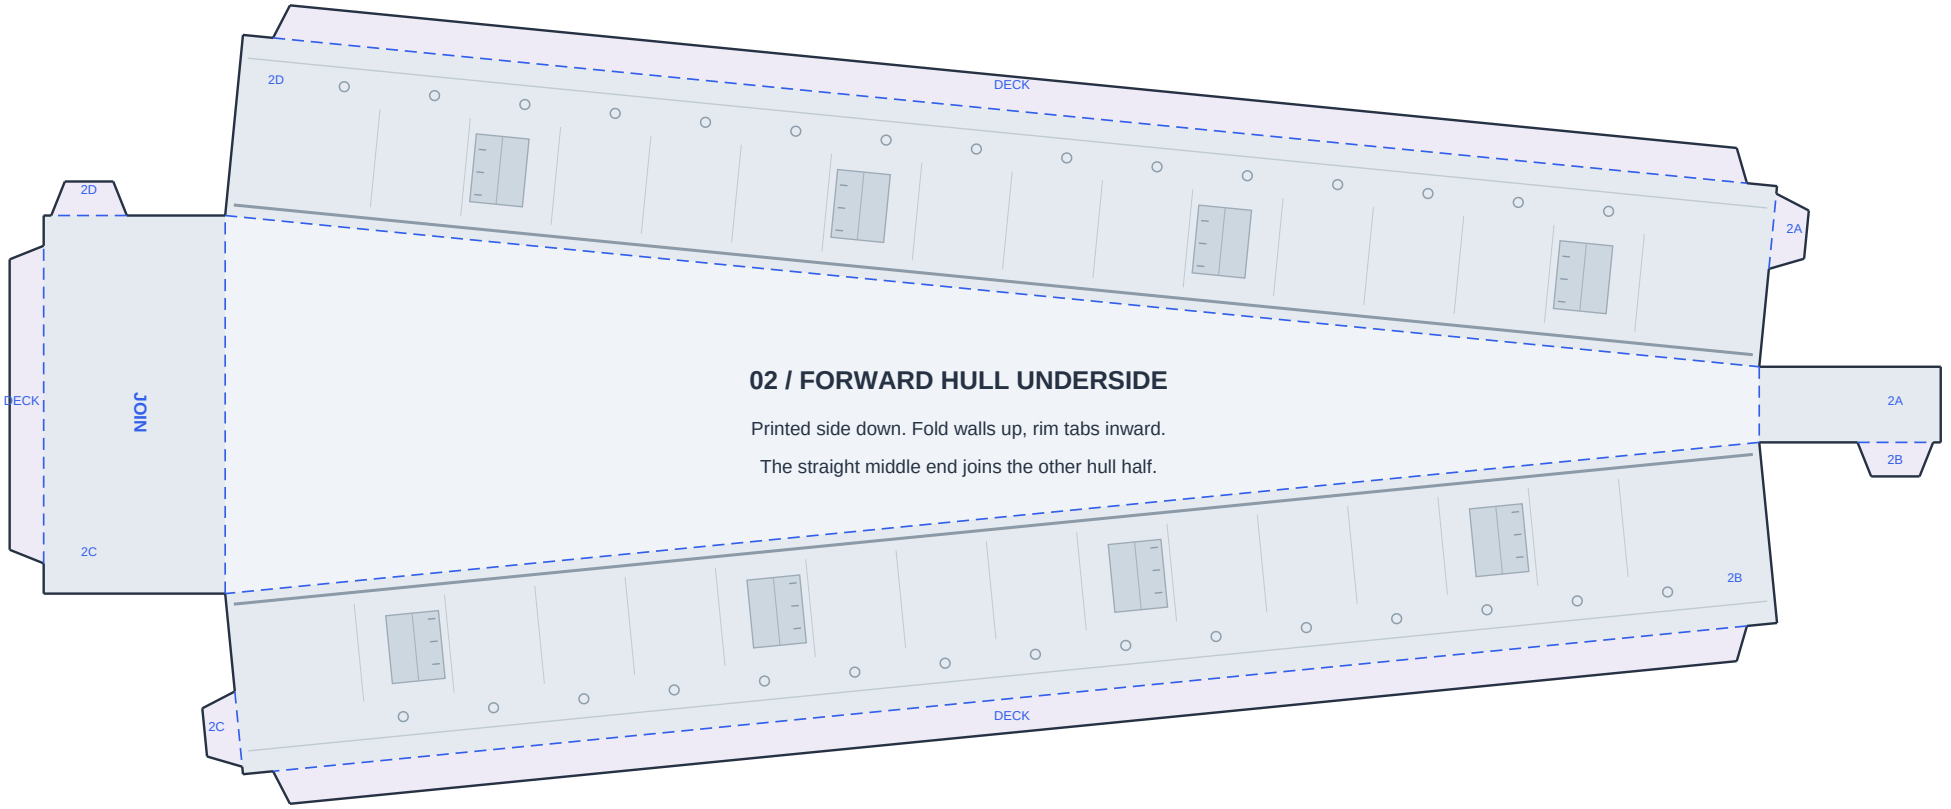

Fold away from print

Glue tabs

This line must measure 50 mm

A4 landscape | Actual size / 100% | Single-sided | No fit-to-page

02 Forward hull

Score blue dashed lines before cutting. Cut bold outer outlines only; keep all pale glue tabs.

Fold walls up with the printed base facing down. Glue matching 2A, 2B, etc. behind their marked edges.

Fold the DECK rim tabs inward. Glue the two straight JOIN end walls back-to-back; keep both bottoms level.

This is a simplified waterline model: the underwater hull, tiny fittings and weapons are omitted.

03 Aft flight deck / 05 Joining strip

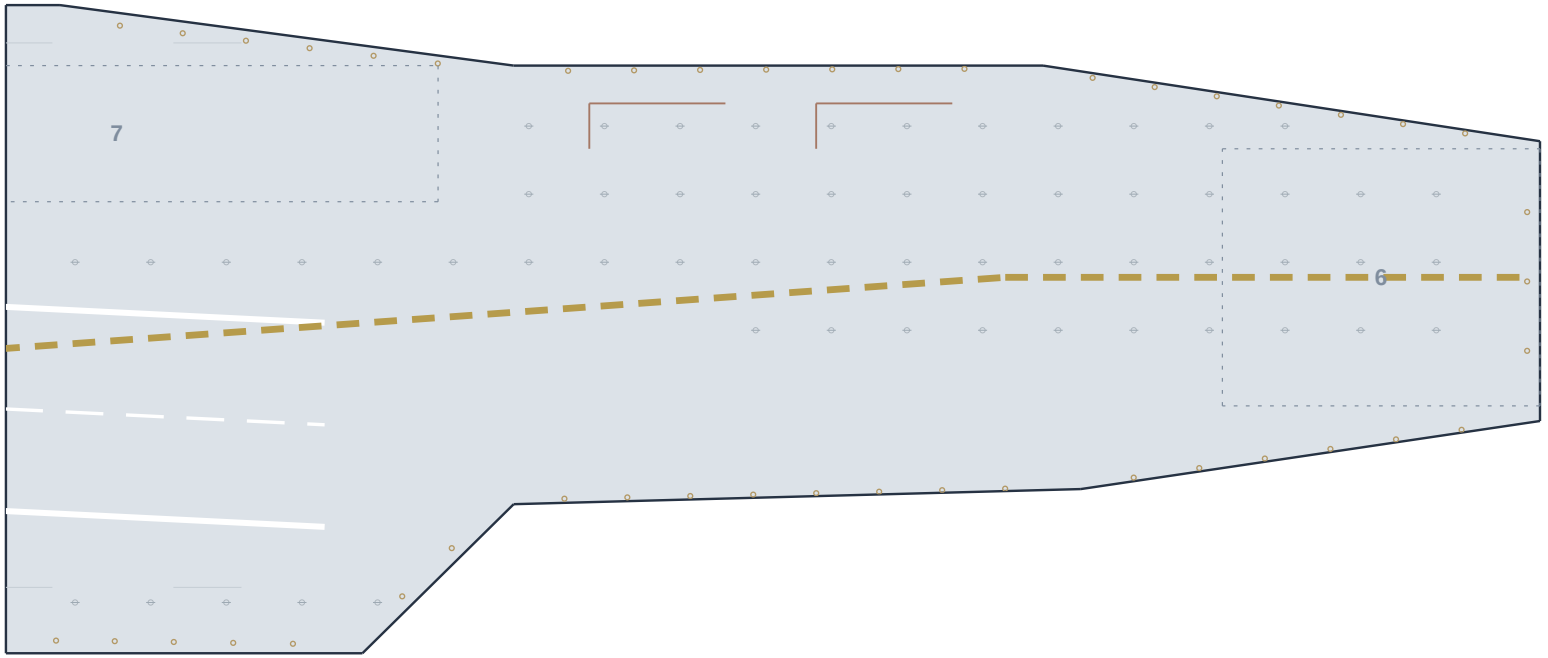

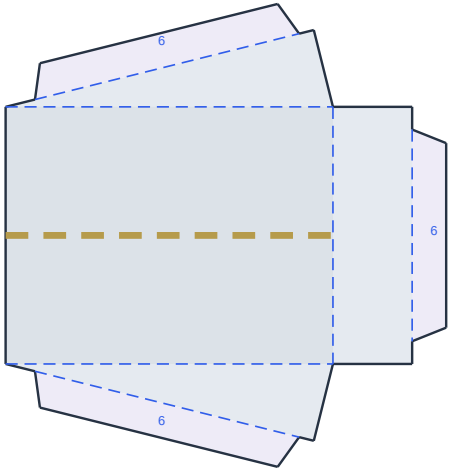

GLUE UNDER AFT DECK 3

GLUE UNDER FORWARD DECK 4

Keep deck pieces 3 and 4 flat. Do not fold their seam.
Place strip 5 under the two straight middle edges,
with 10 mm glued beneath each half. Butt the edges
together; match both the runway lines and the outline.
Then glue the joined deck onto the hull rim tabs.
Use 160-200 gsm paper to keep the broad deck firm.

04 Forward flight deck / 06 Ski jump

06 / Ski jump: fold both triangular sides downward.
Fold the tall end downward and all base tabs inward.
Glue its three base tabs to deck footprint 6.
The low edge faces the stern; the raised edge faces
the bow. The printed centreline follows the runway.
The ramp is a simple straight 14-degree wedge.

Paper Craft

07 Island / 08 Bridge / 09 Funnel / 10 Foremast

Fold walls down, away from print.
Glue matching lettered corner tabs.
Fold the four base tabs inward.

7 fits the starboard deck guide.
11 goes on island roof guide 11.
8 goes on gallery 11 (sheet 6).
9 fits roof box 9, aft of the bridge.
10 fits box 10 on the bridge.
Use a thin layer of PVA glue.

Paper Craft

11 Bridge gallery / 12 Radar platform / 13 Radar screen / 14 Aft signal tower

11 / Keep flat. Glue its underside to island guide 11, centred with an even 4 mm side overhang. Guide 8 faces the bow. Glue bridge 8 on top; the gallery extends 2 mm beyond each bridge wall.

12 / Keep flat. Centre on foremast 10: 4 mm overhang at each end, 3 mm on either side.

13 / Fold the lavender foot away from the printed screen to make a right angle. Glue its printed face to guide 13 on platform 12. The screen stands along the port edge; the foot points toward starboard.

14 / Fold walls down, match lettered corners, then glue base tabs onto deck guide 14 aft of the island.

Fine grey marks are printed detail, not cuts. Only bold outside outlines are cut; blue dashes are folds. Keep all parts from the same version. This paper prototype still needs a physical test assembly.
